South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. North Carolina has a serious problem with mercury contamination from coal\_fired plants. I have yet not heard Duke power adress this problem. It is time to wake up and work together for cleaner air and water!

Sincerely,

Larry Mabry 156 McIntyre Ln Troy, NC 27371-8676 (910) 572-3009
